

# Trust the numbers on **DRUG** MISUSE

~9 in 10 physicians are confident in their ability to address confirmed **PRESCRIPTION DRUG MISUSE** in their patients<sup>1</sup>

**85%** of physicians recently surveyed reported that drug testing gives them that confidence<sup>1</sup>

And yet, **77%** reported that they don't always use it<sup>1</sup>

## WE KNOW HOW MUCH DRUG MISUSE THERE IS:

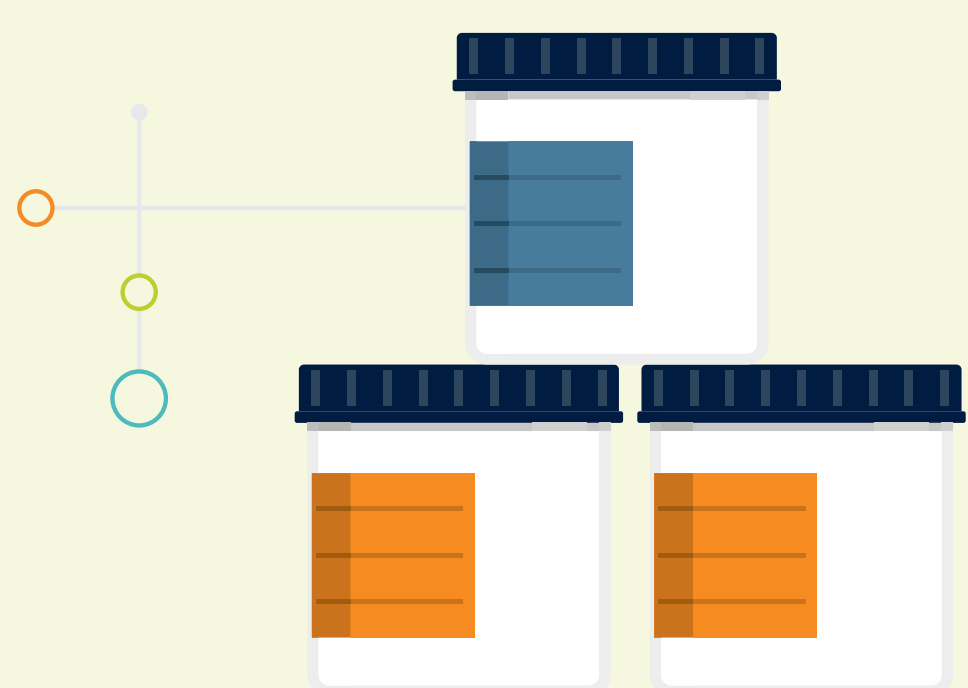

**NEARLY HALF** of all patients show signs of drug misuse based on drug testing results.<sup>1</sup>

## HERE'S WHAT ELSE WE KNOW FROM THE NUMBERS<sup>1</sup>:

Half of all positive tests showed signs of dangerous **drug combinations**

Illicit **fentanyl use** has increased 35% in 2020

**DRUG TESTING IS CRITICAL** to safeguard against drug misuse with patients.

Trust the numbers; make the right decisions on who to test.
